

Whamcloud Quality

- Chris Gearing
Sr. Software Engineer
Whamcloud, Inc.

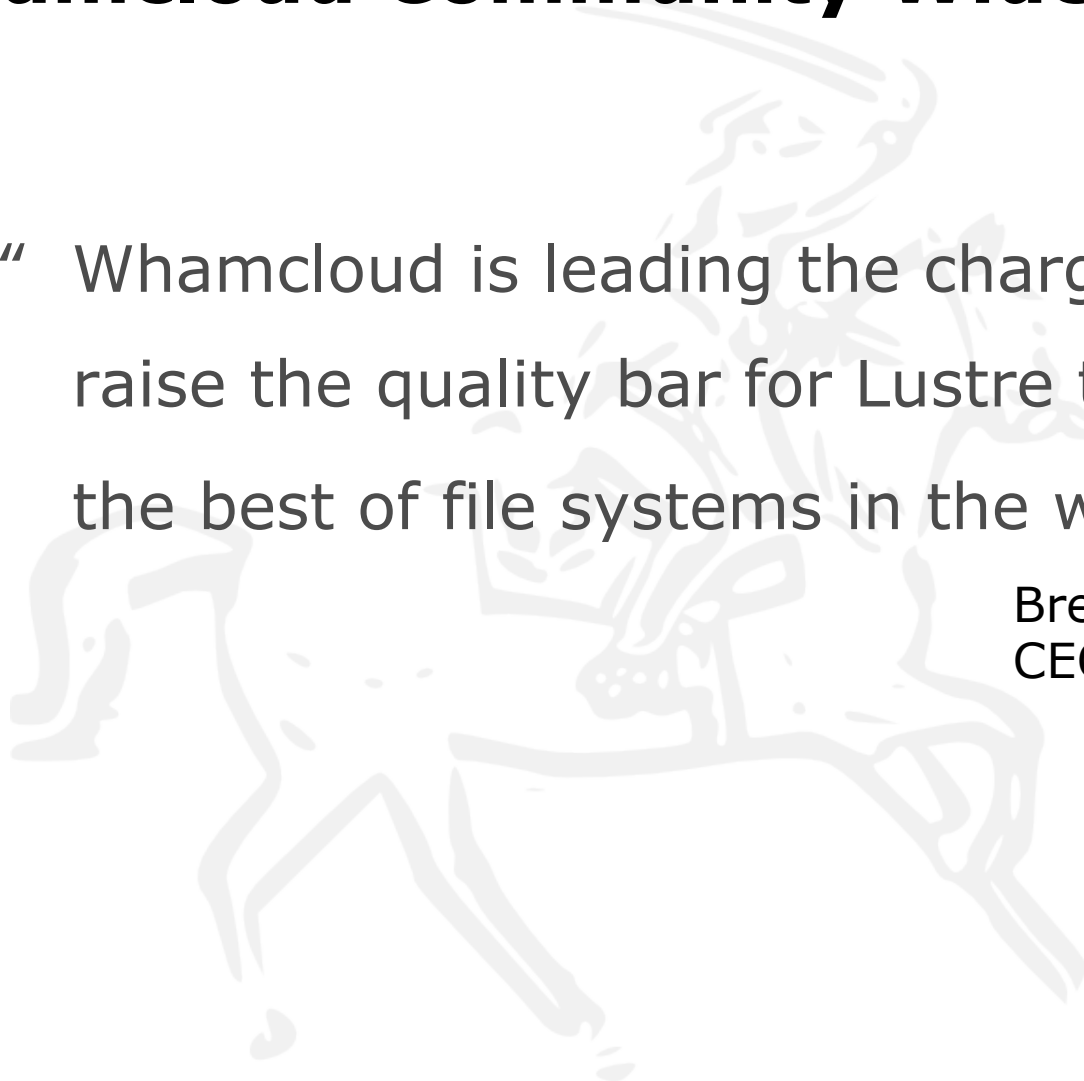

Agenda

- Whamcloud Community Wide Quality
- Repeatable Landing Process
- Scalable Quality Community Tools
- How you can help

Whamcloud Community Wide Quality

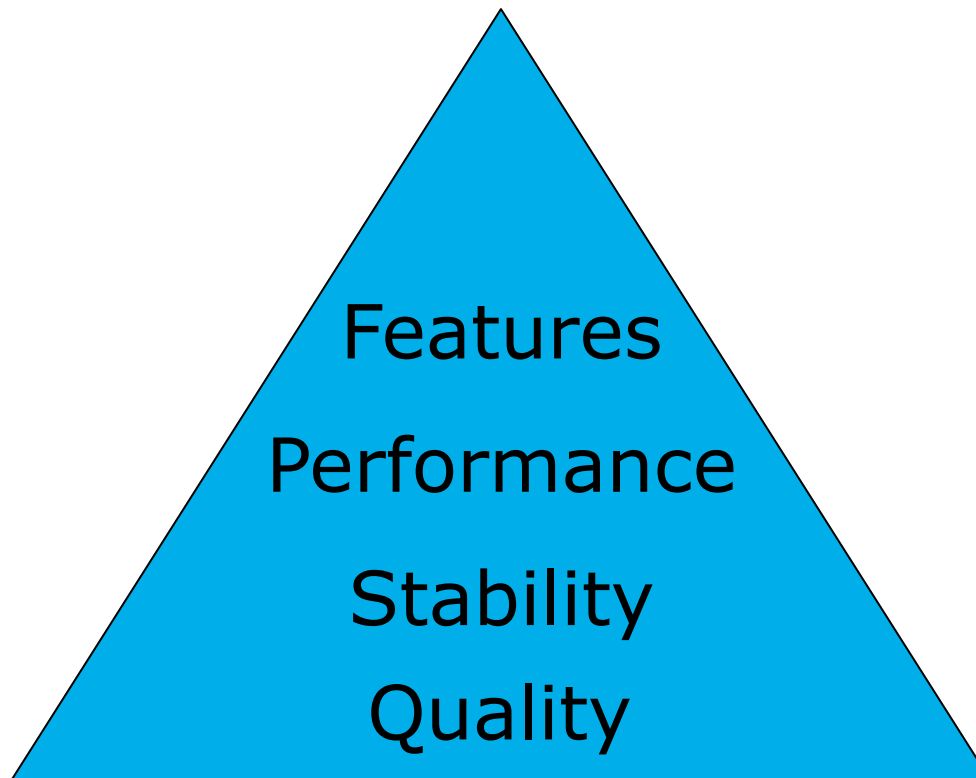

“ Whamcloud is leading the charge to raise the quality bar for Lustre to equal the best of file systems in the world ”

Brent Gorda
CEO Whamcloud

Whamcloud Community Wide Quality

- Whamcloud's base value is that Lustre must be a stable quality product

Whamcloud Community Wide Quality

- Whamcloud is investing money, time and expertise in Quality
- ...is developing tools to enhance the Lustre community
- The whole of its engineering team is orientating itself around quality principles

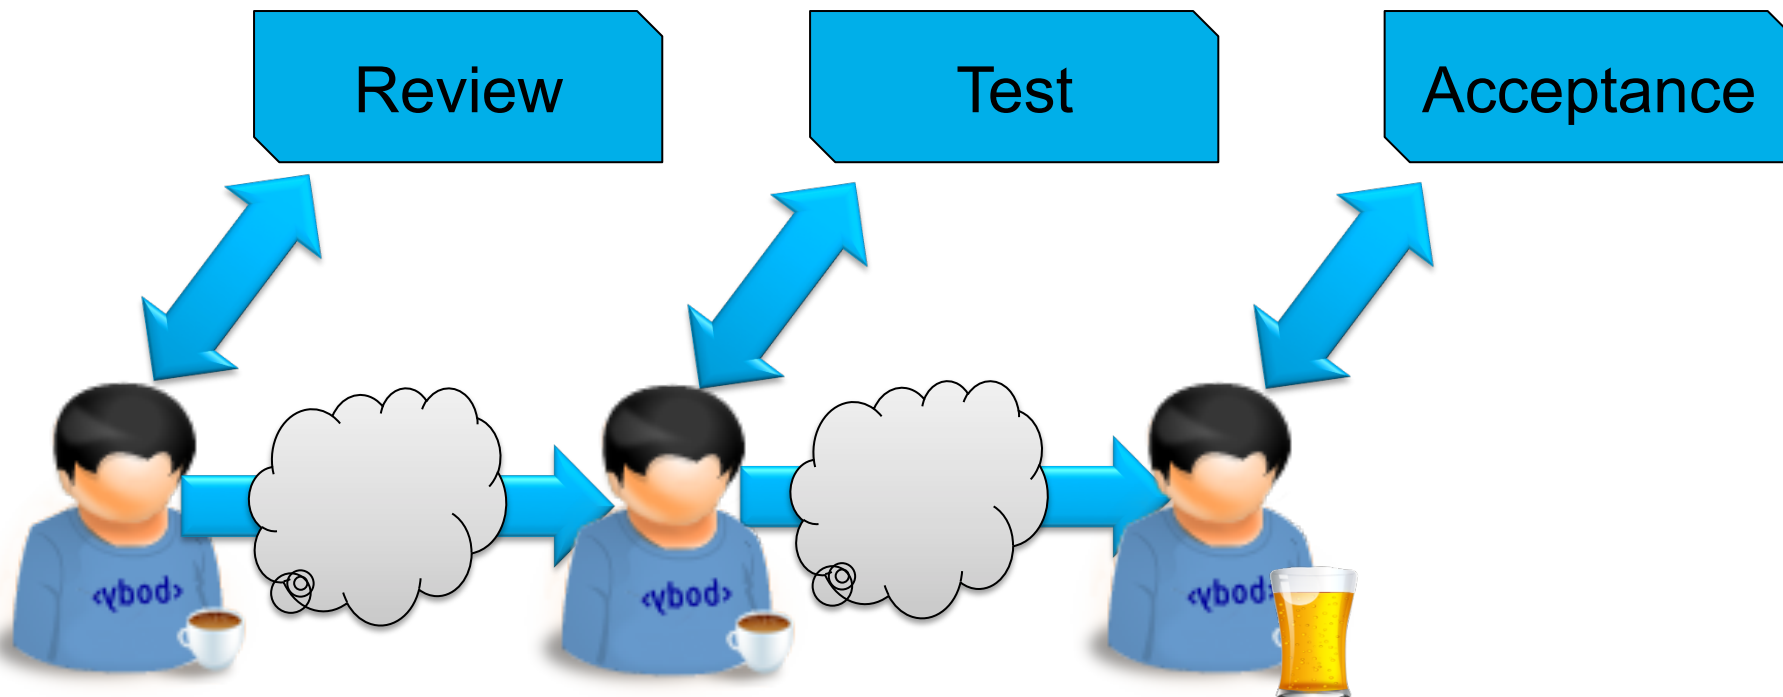

Repeatable Landing Process

- To improve the quality of any product the number one requirement is to have control of the process that produces the product
- In a Quality system the Quality runs through out the process, quality is not just measured at the end

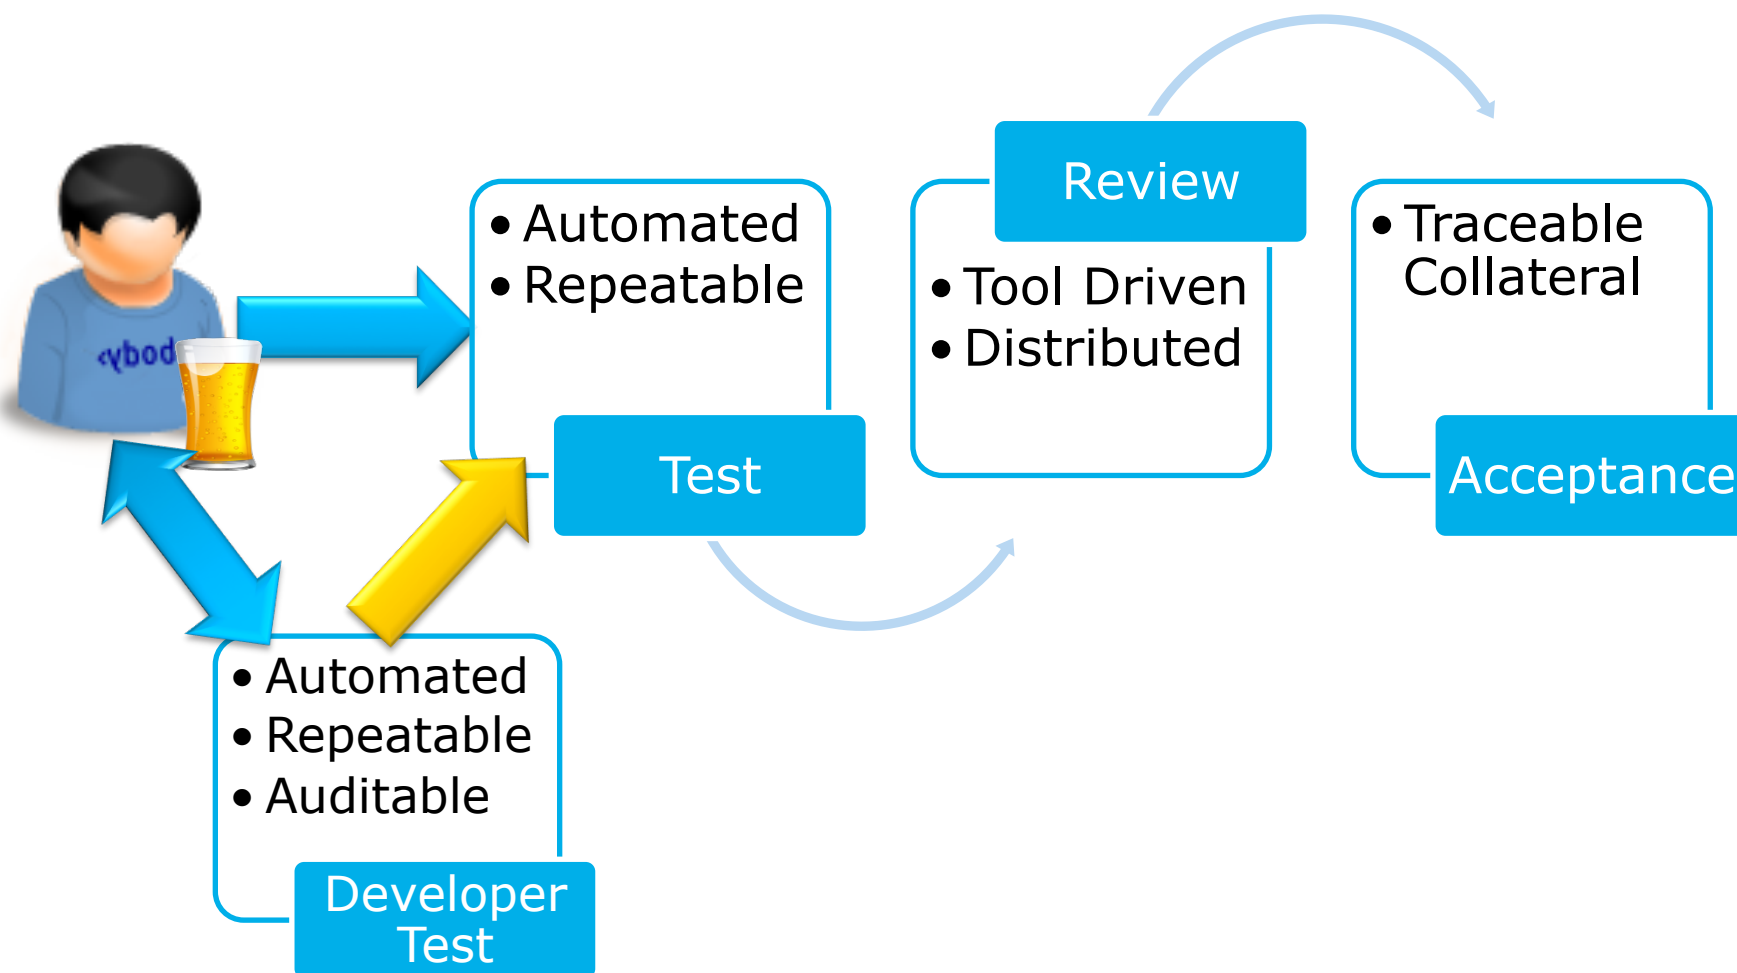

Repeatable Landing Process

- Repeatable landing process from patch submission to patch acceptance
- Increase the quality of the patches being presented for acceptance
- Use the new landing process to push quality further forward in development cycle

Historical Landing Process

Repeatable Landing Process

Scalable Quality Community Tools

Jira, Jenkins
and Gerrit

Casco
Validation
Tool

Maloo
Database

Scalable Quality Community Tools

Jira, Jenkins
and Gerrit

Tools Live Today

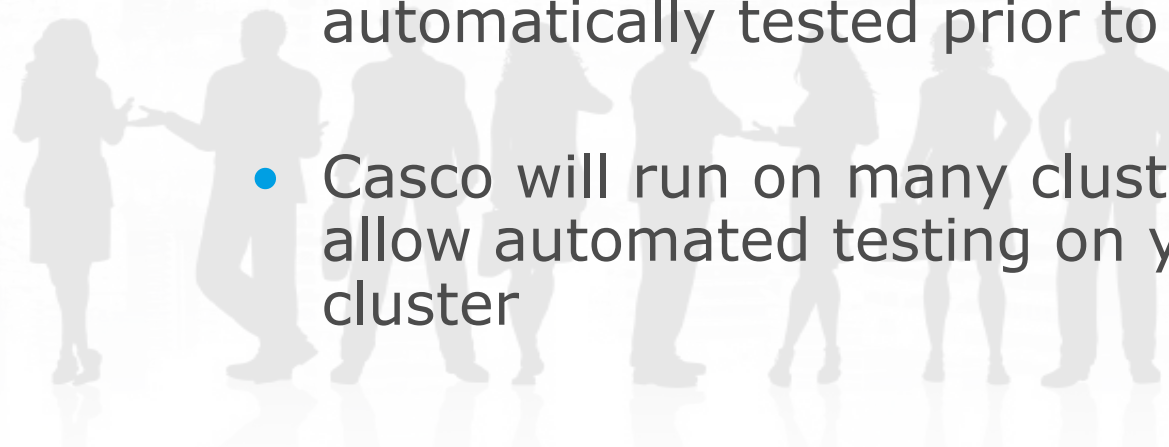

jira.whamcloud.com
build.whamcloud.com
review.whamcloud.com

- **JIRA** is Whamcloud's Issue and Agile management tool
- **JENKINS** is the build tool that continuously builds mainstream branches and all patches submitted by the community
- **GERRIT** is code review tool that allows the whole community to be part of the code review process

Scalable Quality Community Tools

Casco Validation Tool

- Allows anybody to automatically test builds on Lustre Clusters
- Developers can request pre-landing test sessions using Casco
- Casco enables all landings to be to automatically tested prior to review
- Casco will run on many clusters to allow automated testing on your cluster

Scalable Quality Community Tools

Maloo
Database

Maloo Live Today

maloo.whamcloud.com

- Community results database
- Anyone can store results on Whamcloud's instance
- Anyone can setup their own Maloo instance
- Results from any Maloo can be used as landing collateral

Creating issue

Project:
Lustre

Summary:
Test failure on test suite acceptance-small

Description:
This issue was created by maloo for Chris Gearing <chris@whamcloud.com>

This issue relates to the following test suite run:
[https://maloo.whamcloud.com/test_sets/c91feb26-5654-11e0-bb3d-52540025f9af].

How Can You Help

- Lustre needs contributors to ensure successful development
- Help by being a Lustre code reviewer
- To release 2.1 on time we need more systems testing with results arriving in Maloo
- If you can help increase the value of the Lustre then please contact Whamcloud

Chris@Whamcloud.com
